

EPICS [Part 1]

- **First epic:** Develop an application that provides for the patient access to medical history, emergency assistance, medication requests, alarm management, and health reports, all conveniently integrated with their smartwatch.
- **Second epic:** Create a security system that allows me to control the house lights, appliances, cameras, and locks remotely or by voice activation from a registered device.

USER STORIES - Epic 1 [Part 4]

- As a user, I want to be able to access my medical history and view it on my smartwatch, so that I can keep track of my health status and medical conditions easily.
- As a user, I want to be able to activate emergency assistance through my smartwatch, so that I can get help quickly in case of an emergency situation.
- As a user, I want to receive notifications when my family doctor requests medication and send me an authorization request so that I can easily manage my medications. //work on that
- As a user, I want to be able to manage alarms and reminders through my smartwatch, so that I can stay on top of my daily health routine and never miss an important appointment or medication reminder.
- As a user, I want to receive health reports based on health issues, so that I can easily remember what to share with my doctor and track my progress.

USER STORIES - Epic 2 [Part 4]

- As a user, I want to be able to control the lights in my home remotely using a mobile app or by voice activation, so that I can easily turn them on or off even if I have any disability.

- As a user, I want to control appliances remotely through the mobile app, so that I can save time and effort by turning them on or off from anywhere and ensure that they are not left running unnecessarily.
- As a user, I want to monitor my house through a camera remotely or by voice activation, so that I can keep an eye on my property and ensure my safety.
- As a user, I want to be able to secure my home with a remote lock system, so that I can ensure that my home is safe and secure at all times and have peace of mind knowing that only authorized people can access it.
- As a user, I want to be able to receive alerts and notifications on my registered device, so that I can be immediately notified of any suspicious activity or potential security breaches and take action as needed.
